

The last thirteen years sure seem to have moved quickly here at Turf and Soil Mgmt, LLC. Many changes and lots of growth have pushed us throughout Texas achieving many different tasks, but one thing that has remained the same is the pride we take in servicing our customers. When I began my Turf career back in 1994 working summers at the local golf course and eventually graduating college with a Turf degree it has always remained a passion of mine to be involved in turf management in some form. I have to say the last eight years have truly been a highlight in my career pushing our company aggressively to be the leader in the State when it comes to contract service aeration and cultivation practices. We have had such a dedicated team and the leadership from each of them is truly what has created such a great organization to be a part of.

Today my excitement is at an all time high as we announce that we have secured distribution in the Texas market for Baroness Equipment. Although I am certain many of you have not had the opportunity to experience Baroness, they are a leader in the industry. They have been around for over 100 years but only made their way into the USA market 15 years ago. Distribution has been primarily focused on both the East and West coasts and with the product earning quick favor among golf course superintendents, today it is the preferred reel mower technology for some of the top golf facilities in the world. I could go on and on about the products, but we want them in your hands to experience the high quality and precision cutting technology. Demo units are arriving as we speak, and we look forward to introducing you to the technology behind Baroness. Our focus and commitment has been to provide the best customer service possible to each and every customer and we feel Baroness technology will further help us achieve that.
